

国外最近刊行誌参考記事目次

Journal of the Iron and Steel Institute 195 (1960)

Part 2

Presidential address: Production control in an integrated iron and steelworks.

W. F. Cartwright. p. 137

The extrusion of steel.

E. K. L. Haffner, et alius. p. 145

Activity of ferrous oxide in silicate melts containing calcium and manganese oxides.

I. M. Davidson, et alius. p. 163

Thermodynamic study of dilute solutions of sulphur in liquid Fe, Co, and Ni, and binary alloys between these metals.

C. B. Alcock, et alius. p. 169

Carbon as a deoxidizing agent in the production of vacuum-melted steel.

G. H. J. Bennett, et alii. p. 174

A magnetite seam at the scale/metal interface on mild steel. *K. Sachs, et alius.* p. 180

Colorimetric determination of alumina in iron and steelmaking slags with solochrome Cyanine R. *P. H. Scholes, et alius.* p. 190

Desulphurization of basic electric arc turnace steel by the injection of powdered materials.

L. Marples, et alius. p. 195

Improved blast-furnace gas cleaning.

S. A. Lewitt. p. 205

Journal of the Iron and Steel Institute 195(1960)

Part 3

Continuous casting at Terni.

M. Signora, et alius. p. 253

Degassing of steel by vacuum casting for the production of castings and forgings.

V. Scalise, et alii. p. 260

Non-traditional processes for iron-ore reduction.

A. Scortecci, et alius. p. 267

Steels for forging. *R. J. Brown.* p. 278

Flow patterns in 3-dimensional shapes.

N. P. Bacon, et alii. p. 286

Effect of chemical composition on martensite transformation curves. *R. Brook, et alii.* p. 292

Effects of hydrogen on mechanical properties of low-alloy rotor forging steels.

R. M. Goldhoff, et alii. p. 298

Counting non-metallic inclusions in steel.

J. V. Hardy, et alius. p. 302

Effect of creep deformation at 700°C on the transformation of molybdenum carbides in a ferritic steel. *K. A. Ridal, et alius.* p. 307

Discussion at Autumn Meeting. 1959. p. 315

Blast Furnace and Steel Plant 48 (1960) No. 9

Coal preparation at price, Kentucky.

B. Grimm. p. 929

Some Aspects of modern Blast furnace practice.

W. D. Millar. p. 933

Blending coal for pilot-scale test ovens.

W. C. DeSieghardt, et alius. p. 944

Journal of Metals 1960 Sep.

Metal working with explosives. *J. Pearson.* p. 673

High energy rate...its application to metal forming. *E. W. Feddersen.* p. 682

Soviet metallurgical and ceramic journals A selected list. *J. W. Corbett, et alius.* p. 696

Pressure-poured steel. *F. W. Starratt.* p. 698

What are the combined effects of temperature and very high pressure on metals?

R. B. Fischer. p. 700

Response of metals to high velocity deformation. *J. B. Clark.* p. 704

Stahl und Eisen 80 (1960) Heft 18

Development of steel for ribbed concrete reinforcing rods. *W. Jäniche.* p. 1185

Changes in the oxygen content of the steel bath in the basic converter during blowing.

W. A. Fischer, et alius. 1194

Evaluation of questionnaire data on the life of rolls in special steel rolling mills.

E. Wilhelm. 1207

Utilisation of acid blast furnace slag.

H. Beer. p. 1211

Stahl und Eisen 80 (1960) Heft 19

The science of work and the enterprise.

E. Bramesfeld. p. 1257

Studies on the efficiency of continuous rolling mill trains. *H. Bücken, et alius.* p. 1261

Considerations on the design and operation of open-hearth furnaces. *F. Bartu.* p. 1268

Contribution to the study of the behaviour of steels and high-temperature resisting materials against thermal shocks. *F. Eichhorn.*

p. 1275

Archiv für das Eisenhüttenwesen 31(1960) Heft 8

Untersuchungen an Eisenerzen mittels Differential-Thermo-Analyse. *H. Schenck, et alii.*

s. 451

Der Schnitt von Blechtafeln und Bandstahl mit Kreismesserschere. *H. J. Crasemann.*

s. 459

Das Gleichgewicht der Schwefelreaktion zwischen flüssigem, kohlenstoffgesättigtem Eisen und Kalk-Kieselsäure-Tonerde-Schlacken.

H. Schenck, et alii. s. 471

Untersuchungen über die Statistik der Schwankung von Linienintensitäten bei periodischer Funkenentladung. *H. Krempl, et alius.* s. 437

Einfluss des Siliziumgehaltes des Stahles auf die Fischschuppenbildung von Emails.

- F. E. Jesnitzer, et alius.* s. 479
 Untersuchungen über nichtmetallische Einschlüsse in Transformatoren-blechen und über ihren Einfluss auf die Ummagnetisierungsverluste. *F. Pawlek, et alius.* s. 485
 Die stauchung beim Zerreißen von Zugproben. *A. Krisch.* s. 491
 Röntgenographische Ermittlung von Gitterstörungen an Karbonyleisenpulvern. *A. Kochendörfer, et alius.* s. 497
 Anordnung zum Vergleich von Elektronenbeugungsbildern untereinander und mit Debye-Scherrer-Aufnahmen. *H. Kudielka, et alius.* s. 503
Archiv für das Eisenhüttenwesen 31 (1960) Heft 9
 Die Sauerstoffabbaugeschwindigkeit bei der Reduktion von Eisenerzen mit einem Gasgemisch aus Kohlenmonoxyd, Wasserstoff und Stickstoff. *E. Schürmann, et alii.* s. 509
 Einheitliche Darstellung der Ergebnisse von Schlagversuchen an Schienen mit unterschiedlichem profil; Folgerungen für Abnahmevorschriften. *W. Jäniche, et alius.* s. 521
 Einfluss des Phosphors auf die Dämpfung und Alterung von Eisen-Stickstoff-Legierungen. *W. Dickenscheid, et alius.* s. 531
 Keimbildung und Teilchenwachstum bei der Ausscheidung in Mischkristallen. *O. Krisement.* s. 537
 Die Plastische Verformung von Vielkristallen. *A. Kochendörfer, et alius.* s. 549
 Röntgenographische Untersuchung der Eigenspannungen an Stahlproben nach einachsiger plastischer Zugverformung. *E. Macherauch, et alius.* s. 555
 Untersuchung über das Ätzbild der Korngrenzen verschiedener Stähle mit dem Interferenzmikroskop. *R. Pusch, et alius.* s. 563
Revue de Métallurgie 57 (1960) No. 8
 Air and vacuum steel melting induction furnaces, their design and operation. *A. Belly.* p. 679
 The scientific basis of the heat treatment of steels in relation to practical applications. *A. Constant.* p. 695
 Contribution to the study of embrittlement in special steels. Analogies between different types of embrittlement observed in ferritic and austenitic steels. *R. Castro, et alius.* p. 715
 The importance of trace elements for the quality of wire rod. *B. Matuschka.* p. 725
 Standardisation. Types of specimen. Rationalisation of chemical analysis in the iron and steel industry. *E. Jaudon.* p. 731
Stal No. 6 (1960)
 Increase of active area of a sintering machine. *A. V. Drimbo, et alii.* p. 481
 About advantages of using cooled sinter in blast furnaces. *S. I. Eliášberg.* p. 484
 Magnetic properties of sinter, received from mixtures of different carbon content. *Z. I. Nekrassov, et alii.* p. 488
 Automatic control of blast-furnace stoves. *Ie. A. Burlo, et alii.* p. 491
 Making of steel by duplex process from naturally alloyed chrome—nickel pig irons. *I. N. Varnavsky, et alii.* p. 496
 About calculation of construction strength of open-hearth furnace structures. *N. P. Kublanov.* 500
 Influence of various elements of moulds on efficiency of ingots. *S. M. Bobrovskikh, et alii.* p. 502
 About trends in development of steel-melting arc furnaces in the USSR. *L. I. Aronov.* p. 518
 Development of blooming and billet mills. *M. L. Zaroshchinsky.* p. 523
 Trends in development of continuous billet mills. *Ie. A. Zhukevich-Stosha, et alii.* p. 530
 About designing of roll passes for angle bars. *M. M. Shternov.* 535
 Annealing of cold-rolled dynamo steel in continuous furnaces. *N. F. Dubrov, et alii.* p. 543
 The 15X2FH2TPA boron steel—substitute for the 12XH3A, 12X2H4A and 18XHBA Steels. *M. F. Alekseenko, et alii.* p. 548
 Influence of temperature and deformation speed on mechanical properties of carbon steels. *V. S. Zoteiev.* p. 552
Stal No. 8 (1960)
 Slag formation in blast-furnace when using fluxing sinter. *B. N. Starshinov, et alii.* p. 673
 Hangings of burden materials when using oxygen-enriched blast. *M. A. Stefanovich.* p. 680
 Production of fluxed pellets from finely ground concentrates. *D. G. Khokhlov.* p. 686
 Production of prereduced material in rotary kilns and its use in blast-furnaces. *A. I. Gimmel'farb, et alii.* p. 691
 Experience in using 10-metric ton ingots for rails. *F. F. Sviridenko, et alii.* p. 699
 Vanadium removal from iron in converter with injection of pulverized oxidizers. *A. N. Lekontsev.* 701
 Remote control of steel pouring from double-stopper ladle. *P. K. Morokov, et alii.* p. 704
 Rational process for melting ball-bearing steel. *S. G. Voinov.* p. 716
 Selection of rational sheet mill. *B. S. Shapiro.* 722
 Rolling of 750-kg ingots of P 18 grade high-

- speed steel. *N. U. Akaiev*. p. 731
 Variation of mechanical properties of steel during cold rolling. *N. A. Troshchenkov, et alii*. 735
 Investigation of heating and rolling of ingots and slabs of transformer steel.
F. A. Ksenzuk, et alii. 738
 Quality of oxygen blown rimmed steel, produced in converter. *A. P. Guliaiev, et alii*. p. 741
 Mechanical and Thermomechanical strengthening of low-alloy and low-carbon steels.
I. D. Kusema, et alii. p. 745
 Nitrogen as alloying element used in open-hearth low-alloy steel. *Ie. S. Levinzon*. p. 755

—学協会誌—

- 日本金属学会誌 24 (1960) 9
 電解焼入した SKS-7 鋼の摩耗試験. 黒田寿紀, 他…553
 EDTA 滴定法による鉄中の Mg の定量.
 若松茂雄…571
 窒素中における 20% Cr-Fe 合金の窒素吸収におよぼす各種因子の影響について. 岡本正三, 他…573
 亜共晶, 過共晶鉄の凝固過程におよぼす Mn, S の影響. 大平五郎, 他…588
 Alnico 5 磁石の比電気抵抗の温度変化に対する時効処理の影響. 藤原達雄, 他…597
 炭素飽和 Fe, Co, Ni の表面張力におよぼす硫黄の影響. 門間改三, 他…611
 鑄物 32 (1960) 10
 雨堰の形状と位置に対する一考察. 加山延太郎, 他…690
 含チタン鉄の黒鉛形状におよぼす窒素の影響.
 上田淑完…696
 各種添加剤による球状黒鉛鉄の収縮巣について.
 中村 弘, 他…703
 モリブデン—銅系鉄の S 曲線における炭素, 珪素, マンガン, 燐, 硫黄の影響. 徳永洋一, 他…713
 水冷キューボラの新設とその操業. 佐藤良蔵, 他…722
 溶接学会 29 (1960) 10
 溶接用鋼材の連続冷却変態図とその応用について(2)
 関口春次郎, 他…777
 溶接用諸鋼材の冷却時間と脆性(第6報) 関口春次郎
 他…799
 鉄および球状黒鉛鉄鋼の溶接(第1報) 本間正雄,
 他…812
 19-9 DL 耐熱鋼用溶接棒の研究. 伊藤慶典…819
 分析化学 9 (1960) 10
 鉄および鉄中の微量の銅および鉛の定量.
 田島信雄, 他…801
 ポーラログラフ法による鉄鋼中のカルシウム定量法.
 前川静弥, 他…811
 オキシ塩抽出法による鉄鋼中のスズの吸光光度定量
 若松茂雄…858

窯業協会誌 68 (1960) 11

注入時における下注用各煉瓦の破壊原因について.
 佐々木茂式…255

—研究機関誌—

- The Science Reports of the Research Institutes
 Tōhoku University 12 (1960) 5
 Separation and determination of rare earth elements in iron and steel. I, II.
S. Takayama, et alius. …407
 Welding of cast iron and nodular graphite cast steel. I, II. *M. Homma, et alius*. …437
 Report of the Castings Research Laboratory,
 Waseda University. 10 (1959)
 Vacuum-melting of cast iron. (Rept. 2).
I. Iitaka, et alius.…1
 The corrosion of malleable iron in liquid corrosive. *N. Tsutsumi*. …37

鑄研報告 7 (1960)

球状黒鉛鉄の凝固過程について. 草川隆次…1
 鉄基, ニッケル基およびコバルト基耐熱合金の高熱酸化膜およびスケールの構造. 中山忠行…9
 光度滴定による鉄鋼中硫黄分の定量法. 鹿島次郎, 他…23

室蘭工業大学研究報告 3 (1960) 3

高炉ライニングの溶食変形原因に関する研究(第2報)
 田中章彦…521

金属材料技術研究所研究報告 3 (1960) 3

18 Cr-12Ni オーステナイト系ステンレス鋼の諸性質におよぼす Ti の影響. 中川竜一, 他…260
 高張力鋼の溶接割れに関する研究(第1報) 鈴木春義
 他…288

熱管理 12 (1960) 10

平炉炉内圧制御の改正について. 阪本 祝…2

—会社刊行誌—
