Journal of the Iron and Steel Institute 198

(1961) Part 3

Report of council 1960 and accounts. p. 229

Report of Annual General Meeting 1961. p. 242

Integration of production planning, electronic data processing, and process control.

W. F. CARTWRIGHT, et alius p. 250

A simplified hot-extraction apparatus for determination of hydrogen in steel.

C. E. A. SHANAHAN, et alius. p. 257

Metallographic investigations of ancient iron objects. J. PIASKOWSKI. p. 263

Beneficiation of ferruginous sandstones of the Northampton formation. G. E. DAVIES. p. 282

Discussion at Autumn General Meeting, 1960, on fluid flow in furnaces and converters.

p. 290

Journal of the Iron and Steel Institute 198

(1961) Part 4

Operation of oxygen/steam blown converters at VLN plant. M. C. HARRISON, et alius.

p. 341

Survey of technical and scientific uses of computers in iron and steel. D. G. OWEN, et alius. p. 352

Some aspects of airflow through sinter beds.

D. W. MITCHELL. p. 358

On the mechanism of yielding and flow in iron. H. CONRAD. p. 364

The effects of temper rolling and strain ageing on formability of low-C steel.

D. V. WILSON, et alii. p. 376

Activities in lime-alumina melts.

R. A. SHARMA, et alius. p. 386

Tools for heavy forging work.

R. C. BENSON, et alius p. 390

Discussion at Autumn General Meeting 1960 p. 402

Blast Furnace and Steel Plant 49 (1961) No. 7

Oxygen in open hearth steelmaking.

J. W. KIRKPATRICK. p. 621

Economics of light sections.

F. E. Fahy. p. 633

Principles and practices for making very low carbon steel by open-coil annealing.

D. J. BLICKMEDE. p. 639

The relationship between the chemical and plastic properties of Alabama medium-volatile coals and their carbonization behavior.

B. R. KUCHTA, et alius. p. 648

Review of iron and steel literature for 1960

Part II. E. CHESIRE. p. 654

Blast Furnace and Steel Plant 49 (1961) No. 8

Houston Works-Armco Steel Corporation.

C. LONGENECKER. p. 739

The relationship between the chemical and plastic properties of Alabama medium-volatile coals and their carbonization behavior-Part II. B. R. KUCHTA, et alius. p. 766

The outlook for coal and steel.

H. C. LUMB p. 770

Huge roll grinder can take rolls from 11 inch to 81 inches in diameter and 30 feet long. p. 773

Review of iron and steel literature for 1960

Part III. E. Chesire p. 775

Journal of Metals 1961 July

Blast furnace, coke ovens, and liberty bells! p. 497

Part IV. History of the coking industry in the United States. C. S. FINNEY, et alius. p. 501

Journal of Metals 1961 Aug.

Decarburization by open-coil annealing.

D. J. BLICKWEDE. p. 548

Part V. History of the coking industry in the United States. C. S. FINNEY, et alius p. 559

Stahl und Eisen 81 (1961) Heft 13

Steelmaking with the South African Iron and Steel Industrial Corporation Ltd. (Isco)

F. P. DELFOS. p. 849

Fundamentals of the theory and practice of roll pass design. C. M. KRÜGER. p. 858

Study on the layout of the finishing trains in multi-stand high-speed rod mills.

J. P. DE Vos. p. 870

Improving the life of slag ladles.

H. KAISER. p. 880

Contribution to the study of testing the initial material for wide strip by means of the ultrasonic echo test. C. STRASSBURGER. p. 885

Stahl und Eisen 81 (1961) Heft 14

Investigations on the operation of a three stand tandem cold rolling mill.

P. FUNKE JUN, et alius. p. 909

Experiments to regenerate muriatic rinsing waters containing iron. H. TERNES, et alius p. 921

Influence of the friction mates on the contact between solids in cold shaping.

(抄録 1740 ページよりつづく)

転モーメントが不変となり、また浸漬深さもある深さ以上になれば装置恒数がほぼ一定になるから、これらの影響なしに信頼しうる粘度値をもとめることは可能である。

粘度計の材料は高温度におけるスラグの侵蝕に耐え、温度変化に安定で、小さい膨脹係数を有するものでなくてはならないが、この要求を満たすものはきわめて少ない。従来使用された黒鉛、MoとW、その他のものはいずれも一長一短で充分なものとはいえない。この点、二珪化モリブデンはスラグ侵蝕に耐え、1700°Cまで

は高い酸化安定度をもつから、回転体材料としては好適である。それに、FeOとMnOに富むスラッグの場合にこれを還元するがため使用できなかつた黒鉛も、容器が大きくなればなるほどそのような還元の影響が小さくなるから、短時間浸漬することによつて工場用として使用しうる。

かくして、浸漬深さの正確な調整、一定のSpaltbreiteの厳守の必要なく、簡単な操作で正確な結果をうる工場用粘度計の作製は充分可能である。 (岡嶋和久)
