## “Tetsu-to-Hagané” Vol. 73 No. 1, January, 1987

### Contents

#### Foreword

|                                                                        |                   |
|------------------------------------------------------------------------|-------------------|
| Best Wishes for the Prosperous New Year 1987 .....                     | Y. HISAMATSU... 1 |
| Production and Technology of Iron and Steel in Japan during 1986 ..... | T. ANDO... 3      |

#### Technical Reviews

|                                                                                      |                                |
|--------------------------------------------------------------------------------------|--------------------------------|
| Recent Development in Fractography .....                                             | R. KOTERAZAWA...19             |
| A New Departure of Long Term Creep Curve Prediction up to the<br>Tertiary Stage..... | K. MARUYAMA and H. OIKAWA...26 |

#### Commentaries

|                                                                                                          |                                     |
|----------------------------------------------------------------------------------------------------------|-------------------------------------|
| Current Trends of the Hydrogenation Reactor Materials for High<br>Temperature and Pressure Services..... | T. ISHIGURO...34                    |
| Analysis of Impurities in Metals by Particle Accelerators.....                                           | T. NOZAKI, M. UDA and E. YAGI...41  |
| Preparation of Magnetic Fluid and Its Application .....                                                  | K. NAKATSUKA and J. SHIMOIZAKA...55 |

#### Reports on the Research Committee of ISIJ

|                                                                                                    |                  |
|----------------------------------------------------------------------------------------------------|------------------|
| Report of the Activity of Joint Research Committee on Theory of<br>Models and Scale-up Method..... | K. WATANABE...64 |
| Isolation and Determination of Sulphides in Steel.....                                             | K. NARITA...67   |

#### Technical Papers and Technical Reports

|                                                                                                                              |                                                                    |
|------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------|
| The New Instrumentation System of Chiba Sinterplant and Its Effect in Kawasaki<br>Steel Corporation.....                     | K. MIKI, H. TAKAHASHI, K. NAKAMURA and Y. SASAKI...84              |
| Development of a Mathematical Model to Estimate Burden Distribution<br>in Bell-less Type Charging for Blast Furnace<br>..... | Y. OKUNO, S. MATSUZAKI, K. KUNITOMO, M. ISOYAMA and Y. KUSANO...91 |
| Peritectic Reaction and $\delta$ - $\gamma$ Transformation Mechanism in Carbon Steels<br>.....                               | T. TAKAHASHI, K. OHSASA and J. TANAKA...99                         |
| Effects of Nb and Ta on the Formation of “A” Segregation and Carbo-nitride in 12%Cr Steel<br>.....                           | H. YAMADA, T. SAKURAI, T. TAKENOUCI and Y. IWANAMI...107           |
| Formation Mechanism and Prevention Method of Facial Cracks of<br>Continuously Cast Steel Slabs Containing Boron<br>.....     | K. YAMAMOTO, H. G. SUZUKI, Y. OONO, N. NODA and T. INOUE...115     |
