

# "Tetsu-to-Hagané"

Vol.79 No.10, October, 1993

## Contents

|                                 |                                                                                                                                       |             |
|---------------------------------|---------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Special Presentation</b>     | <b>My Views on the Development of Steelmaking Technology in Japan</b> / M. KURITA.....                                                | <b>N704</b> |
| <b>Lecture</b>                  | <b>Rist Operating Diagram(II)</b> / Y. ONO.....                                                                                       | <b>N711</b> |
| <b>Commentary</b>               | <b>Trace Elements in the Human Body</b> / K. FUWA.....                                                                                | <b>N716</b> |
|                                 | <b>Recent Development of Iron Oxide for Ferrite and Its Manufacturing Technique</b>                                                   |             |
|                                 | <b>from Pickling Waste Liquor of Steel Sheet</b> / T. MURASE and N. HIRAI .....                                                       | <b>1129</b> |
|                                 | <b>Sorption of Flavors into Plastic Films Used for Interior Can Coating</b> / T. MATSUI and Y. OSAJIMA .....                          | <b>1138</b> |
| <b>Paper</b>                    | <b>Mechanism of the Formation of Large Pore in the Assimilated Part in the Sintering Process of Pisolite Ore</b>                      |             |
|                                 | T. OTOMO, N. TAGUCHI, E. KASAI, Y. OMORI and T. KAWAGUCHI .....                                                                       | <b>1145</b> |
|                                 | <b>Raceway Smelting Reduction Process with Fine Iron Ore Injection from Blast Furnace Tuyeres</b>                                     |             |
|                                 | K. NOZAWA, K. SHIBATA, M. SHIMIZU and H. W. GUDENAU .....                                                                             | <b>1151</b> |
|                                 | <b>Monitoring Technique of Solid Flow State in Pneumatic Conveying of Powder Materials</b>                                            |             |
|                                 | S. KOBAYASHI, M. ISHIGAKI and S. INABA .....                                                                                          | <b>1157</b> |
|                                 | <b>Solubility of Carbon Dioxide in Molten(BaO+CaO) - (BaF<sub>2</sub>+CaF<sub>2</sub>) Fluxes and Their Dephosphorization Ability</b> |             |
|                                 | <b>to High Carbon Ferrochromium Liquid Alloy</b>                                                                                      |             |
|                                 | S. HARA, H. SUGANO and K. OGINO .....                                                                                                 | <b>1164</b> |
|                                 | <b>Effect of B on the Intra - Granular Ferrite Formation in Ti - Oxides Bearing Steels</b>                                            |             |
|                                 | K. YAMAMOTO, T. HASEGAWA and J. TAKAMURA .....                                                                                        | <b>1169</b> |
|                                 | <b>Influence of Martensitic Islands on Fracture Toughness and Strength of Weld Heat - affected Zone</b>                               |             |
|                                 | T. TAGAWA, T. MIYATA, S. AIHARA and K. OKAMOTO .....                                                                                  | <b>1176</b> |
|                                 | <b>Analysis of Embrittlement in Weld Heat - affected Zone due to Formation of Martensitic Islands</b>                                 |             |
|                                 | <b>by Local Criterion Approach</b> / T. TAGAWA, T. MIYATA, S. AIHARA and K. OKAMOTO.....                                              | <b>1183</b> |
|                                 | <b>Effects of Thermomechanical Treatments on High Temperature Deformation Behaviors of</b>                                            |             |
|                                 | <b>an SKD11 Tool Steel</b> / J. MO, A. SHIBATA, K. MIYAHARA and Y. HOSOI .....                                                        | <b>1190</b> |
|                                 | <b>Effect of Tin Addition and Condition of Inter - pass Aging in Cold Rolling on</b>                                                  |             |
|                                 | <b>Secondary Recrystallization of Grain - oriented Electrical Steel</b>                                                               |             |
|                                 | Y. KAWAMO, S. NAKASHIMA, K. TAKASHIMA and J. HARASE .....                                                                             | <b>1197</b> |
|                                 | <b>Nitriding and Sintering Mechanisms of 12%Cr Ferritic Stainless Steel Powder Compacts</b>                                           |             |
|                                 | <b>in Nitrogen Atmosphere</b> / N. NAKAMURA, S. TAKAKI, M. KAMADA and Y. TOKUNAGA .....                                               | <b>1204</b> |
|                                 | <b>The Growth of Cellular <math>\delta</math> Phase in 69Ni - 15Cr - 8Fe - 6Nb Base Alloy</b>                                         |             |
|                                 | K. KUSABIRAKI, I. HAYAKAWA and T. OOKA .....                                                                                          | <b>1210</b> |
| <b>Technical Article</b>        |                                                                                                                                       | <b>T137</b> |
| <b>ISIJ Information Network</b> |                                                                                                                                       | <b>N701</b> |
