

Contents

Fundamentals of High Temperature Processes

Basic Characteristic of Swirl Motion in Tapered Bath Agitated by Gas Injection

Y. KOSAKA, Y. UEDA and M. IGUCHI623

Mechanical Properties

Effects of Inclusion and ODA Sizes on Gigacycle Fatigue Properties of High-strength Steels

Y. FURUYA, S. MATSUOKA, T. KIMURA and M. HAYAISHI630

Wear Reduction of Carbide Tools Observed in Cutting Ca-added Steels for Machine

Structural Use

N. MATSUI and K. WATARI639

Superplastic Anisotropic Behavior in Magnesium Alloy of AZ91D Grain Refined by

Isothermal-rolling

Y. TORISAKA, S. FUDETANI, M. HORIHATA and M. HIROHASHI647

Dependence of Magnetic Properties on Dislocation Density in Commercial Steels Deformed

in Tension

K. YAEGASHI655

Effect of Mn on Strain Aging Behavior of Ultra Low Carbon Steel Sheets

H. TANIGUCHI, T. KIYOKAWA, M. MIZUTANI and R. OKAMOTO662

Effects of Silicon, Molybdenum, and Nitrogen on Elevated Temperature Properties of

Low Carbon Austenitic Stainless Steels

T. NAKAZAWA, S. DATE, M. TENDO and M. YAMAZAKI670

New Materials and Processes

Dynamic and Static Restoration Processes in the α Region of Commercially Pure Titanium, and Effects of Oxygen and Iron on These Processes

H. FUKAI, K. MINAKAWA and C. OUCHI676

ISIJ International, Vol.45 (2005), No.8, Synopses and TitlesA25
