

"Tetsu-to-Hagané"

Vol.94 No.5 May, 2008

Contents

Chemical and Physical Analysis

- Application of Laser Ablation–Laser Induced Fluorescence Spectroscopy to Analysis of Steel
—Detection of Low Carbon in Steel—

H. KONDO and N. HAMADA155

Forming Processing and Thermomechanical Treatment

- Possibility of Applying Superplastic Forging to the Micro Forming of SUS304

M. KATOH and Y. TORISAKA160

- Ultrafine-grained Steel Bars Fabricated Using Commercial Caliber-rolling

T. INOUE, S. TORIZUKA, E. MURAMATSU and K. NAGAI164

Surface Treatment and Corrosion

- The Influence of Additional Ni and Cu in Steel on the Galvanizability and Oxidation State of
Si, Al, Mn Bearing Steels

Y. TAKADA, M. SUEHIRO, Y. IKEMATU and K. TANAKA173

Transformations and Microstructures

- Influence of Solute C on Recrystallization Behavior in Ti Added Low Carbon Cold Rolled Sheet Steel

N. SUGIURA, N. YOSHINAGA, K. KAWASAKI, Y. YAMAGUCHI and T. YAMADA179

ISIJ International, Vol.48 (2008), No.5, Synopses and TitlesA15
